Duet Design Group and Inside Stories

What are the unexpected benefits of working with a professional interior designer?

Quite simply, it's spaces done right. A designer understands form and function, and can implement these principles per the client's budget—without the costly mistakes an untrained person may make.

How do you get to know your clients' needs and tastes?

We spend time getting to know them during comprehensive programming meetings. A unique questionnaire gets the creative thoughts flowing, then we review inspiration images of spaces or furnishings that make them feel good. Next, we dive into bags of fabrics, as it's important to understand clients' color and texture preferences. We also spend a lot of time in each space to be designed to understand how our clients want to utilize them.

Do you believe that professional interior design should be attainable by everyone?

We do, and it is why we created Inside Stories. We feel that when done right, every space, no matter how small, can be a direct reflection of you, and that everyone deserves to be proud of the spaces they live or work in.
